Meet Miss Rust College

Greetings:

One thing I keep learning is that the secret to success is in doing things for others. The secret to success is not in "doing what one has to do" but in "liking what one has to do."

Rust prides itself on education and programs that will provide opportunities for those in pursuit of excellence. Before coming to Rust, I was eager to find a new environment full of life and a place I would feel at home. Fortunately for me, Rust would be that and more. Once I arrived at Rust, I quickly realized how the campus and its faculty would really play a vital role in my becoming a young woman.

My main goal in life is to become an outstanding woman dedicated to scholarship, service and growth within my community. Rust is providing me with all the necessary skills needed for a bright future. With the pursuit of knowledge in mind, at all times, I hope to conquer all potential endeavors and also help someone else along the way.

Sincerely,

Ereca King

Miss Rust College elect
